PROJECTS

Advance Gym Website

- Built a responsive gym website with personalized diet/workout plans, video library, and dynamic schedule updates.
- Implemented user tracking features to monitor workout routines and progress.
- Developed frontend with React.js and Tailwind CSS; backend with Node.js, Express.js, and MongoDB.
- Created and integrated RESTful APIs for authentication and plan management.

Book Store Management System (Java + MySQL)

- Built a console-based application using Java with JDBC integration for MySQL database operations.
- Designed and implemented user authentication, book CRUD operations, and order management features.
- Created modular service layers (UserService, BookService, OrderService) for clean code separation.
- Performed SQL queries using PreparedStatement to ensure secure and efficient data transactions.

MedPredict – Alternative Medicine Recommender System

- Developed a MERN stack web app recommending herbal remedies using cosine similarity on user-entered symptoms.
- Built frontend with HTML, CSS, JavaScript, React.js, and backend with Node.js (Express.js) and MongoDB.
- Integrated REST APIs for symptom input and ML-based result display using NLP and vector matching.
